AMENDMENT - I
TO MSA COMMODITY CODE BOOK
July 1, 1952 Edition

The effect of this Amendment I to the July 1, 1952, edition of the MSA Commodity Code Book is to continue the classification of Engines for Tractors in Code 7711 as it was in previous editions of the ECA Code Book. The change in the 1952 Schedule B which classified Tractor Engines with Internal Combustion Engines had been inadvertently overlooked.

Concurrently with the issuance of the Amendment, the following changes in Codes will become effective:

AMMENDMENT II

TO MSA COMMODITY CODE BOOK

July 1, 1952, Edition

The effect of this Amendment II to the July 1, 1952, edition of the MSA Commodity Code Book is to continue the classification of "Tin Ores" in code 6506 as it was in previous editions of the ECA Code Book and to eliminate a non-existing MSA code number appearing in the Cross Reference List.

The following changes are effective as of July 1, 1952, the original date of issuance of this Code Book.

NOTE

The commodity codes in the ECA Commodity Code Book issued on June 15, 1949, were based on the 6-digit codes used in the January 1, 1949, edition of *Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported from the United States.*

On January 1, 1952, the U.S. Department of Commerce introduced approximately 1,000 revisions in the classification of the 65,000 commodities included in Schedule B. in order to improve the commodity classification structure and to serve more adequately the statistical needs of American Business and Government.

Since American exporters use Schedule B extensively to prepare the documents required for export shipments, MSA has revised this Commodity Code Book to take into account the changes in the 6-digit numbers in the January 1, 1952, edition of Schedule B. Aside from these changes and a few modifications *(shown on page III)* this code book is identical with the June 15, 1949, edition.

Procurement Authorizations originally issued on or after July 1, 1952, will be issued in terms of the codes specified in this code book.

INTRODUCTION

The MSA Commodity Code Book contains a list of 86 groups into which all food, agricultural, and industrial commodities as well as services and transportation costs may be classified. Each of these groups is identified by a 3-digit number on the left-hand side of the description

Under each commodity group there appear several descriptive titles which indicate the types of commodities which are included. Each of these titles is in turn identified on the left-hand side by a 4-digit code number and on the right-hand side by a series of 6-digit numbers. These 6-digit numbers are the commodity code numbers in the *U.S. Department of Commerce Schedule B "Statistical Classification of Domestic and Foreign Commodities," January 1, 1952 edition.* The 6-digit numbers, separated by a hyphen, indicate that the descriptive title covers all the commodities in Schedule B which are assigned code numbers falling between the hyphenated codes, including the codes given.

It is the intent of the commodity list to enable the users to identify uniformly commodities in terms of MSA 3-digit numbers. In order to do this, it is recommended that each user obtain a copy of the above-mentioned Schedule B directly from the U.S. Government Printing Office in Washington. With the aid of the Schedule B-MSA Code Cross-Reference List, included in this booklet, the 6-digit numbers may easily be converted to the appropriate MSA Commodity Codes. (See page 14).

The Commodity Code Book is intended to insure a common understanding among MSA offices, recipient countries, suppliers and prospective suppliers, persons or organizations charged with making payments under procurement authorizations, and persons or organizations interested in the commodity composition of MSA programs, as to the coverage of each MSA commodity group.

SCHEDULE B CODES WHICH MUST BE SUBDIVIDED FOR MSA PURPOSES

NOTE: The 1952 edition of Schedule B contains a number of new 6-digit commodity codes created by gathering together items from two or more 1949 Schedule B codes. For example, the 1952 Schedule B contains a new code - 618269 - for "wire, nails, staples, and spikes other than iron and steel." In the 1949 Schedule B, these items were included in other codes which have been done away with in the 1952 edition - 630600, aluminum wire and manufactures; 643998, copper, manufactures not elsewhere specified; and 647998, brass and bronze manufactures not elsewhere specified

As a result of such combinations as the one described above, it is necessary to subdivide certain 1952 Schedule B codes in order to avoid changing the coverage of MSA 4-digit codes from that which has been in effect previously. Thus, returning to the example described above, if nonferrous nails, staples, and spikes are financed by MSA, the aluminum nails in Schedule B, code 618269, must be classified in MSA code 6913, miscellaneous aluminum products, and the brass or bronze nails in Schedule B, code 618269, must be classified in MSA code 6933, miscellaneous brass and bronze manufactures.

The table below shows the 1952 Schedule B codes which must be subdivided for MSA purposes in order to maintain the coverage of the MSA codes shown in the right-hand colum as comparable as possible with that of the MSA/ECA codes used in the past.

SCHEDULE B - MSA CROSS REFERENCE LIST

The following example is intended to illustrate the use of the Schedule B-MSA Cross Reference List: A specific commodity, perforated copper plates, is to be classified under the appropriate MSA 3-digit code. Reference to the Schedule B shows that "Copper Plates; Perforated" are coded under Schedule B #642300. Reference to the Cross Reference List shows that items coded #642300 in Schedule B are to be classified under MSA 4-digit code number 6922, Miscellaneous Copper Manufactures. The proper MSA 3-digit code for this commodity is 692 since 6922 is a subtitle listed under this code.
